

SN 10/614,772  
Docket No. S-100,626  
In Response to Office Action dated September 20, 2005

AMENDMENTS TO THE SPECIFICATION:

Please delete the third paragraph beginning on page 5, lines 15-19, and replace with the following paragraph:

Those having skill in this art will readily understand that radial compressor/pump 14 is so called because rotor 10 can be used in many diverse applications. Among these applications are situations where fluid flow 14 may be a compressible fluid and situations where fluid flow 14 may be an incompressible fluid. In the case of an incompressible fluid, fins 11a would act as a pump.
